CORPORATE OVERVIEW

Headquartered in Fairfax, VA, Information Management Group, Inc. (IMG) is a rapidly growing, debt-free small business specializing in the analysis, design, and application of information technology (IT) and communications solutions for government and commercial organizations worldwide. We have a 24-year history providing automation services throughout the United States and overseas; we provide cleared, experienced, and certified professionals for on-site IT and information assurance (IA) services to our customers. All of our personnel are full-time employees holding industry certifications—we are not a staffing company.

IMG is committed to helping our clients use technology to be more efficient, effective, and productive. Our people bring integrity, industry and customer knowledge, and technical excellence to every project. Developing solutions that integrate our experience and expertise with industry best practices ensures the highest level of quality is achieved. From maintaining service levels on a long-standing contract to meeting no-notice surge requirements, success comes from meeting your goals today and into the future.
